

In This Document

This document describes the new features, resolved issues and installation procedure for the February 2009 Symphony 32 Update.

Who Should Update

All Symphony 32 users should update to the February 2009 versions.

Requirements

- **IMPORTANT!** - X-Symphony firmware v2.7 or higher is required. An X-Symphony Firmware Update package is included in the February 2009 Symphony 32 Update package.
- Macintosh PPC or Intel CPU, 1 GHz or faster.
- 1 GB RAM minimum, 2 GB recommended.
- OS X 10.5.5 or greater is required.

New Features

- **Sbus** - Connect one Symphony 32 card to the second port of a Symphony 64 card.
- **Euphonix EuCon support** - Control the Maestro mixer from EuCon-compatible control surfaces.
- **Symphony Source** - enable and disable PCI cards from the Maestro Control window (or the OS X utility Audio MIDI Setup) without the need to remove them from your Mac.
- Set Clock Source from Audio MIDI Setup
- View X-Symphony firmware versions from the "About Maestro" pane.
- Revised User's Guide, available here:
<http://support.apogeedigital.com/index.php/symphony/documentation/156-symphony-32-users-guide>

Resolved Issues

- Maestro mixer outputs - When a new output pair is selected, the previously assigned output pair is reset to default routing.
- Maestro Autolaunch now works as expected.
- Latency correction is now implemented.
- Mixer channel names are preserved across a system reboot

To Install

1. Download the **Symphony 32 Update February 2009** file.
2. Double-click on the **Symphony Software Installer** icon to initiate installation, and follow instructions provided by the Installer. After installation of software it will be necessary to re-start your Mac.
3. If it's necessary to update X-Symphony card firmware, a warning will be displayed at system startup. Open the included X-Symphony Firmware Update package and follow the instructions provided in the package.
4. **IMPORTANT** - After re-starting the Mac, be sure to set Clock Source and Symphony Source in Maestro. Consult the updated Symphony 32 User's Guide for details of these settings.
