

Using Apogee Mics and Interfaces with Stagelt

Stagelt.com is a revolutionary way for artists to reach their fans with “a front row seat to a backstage experience”. What separates Stagelt from other streaming services is how it’s set up like a music venue, where audience members purchase tickets in advance for a scheduled show, and artists get paid for their performances!

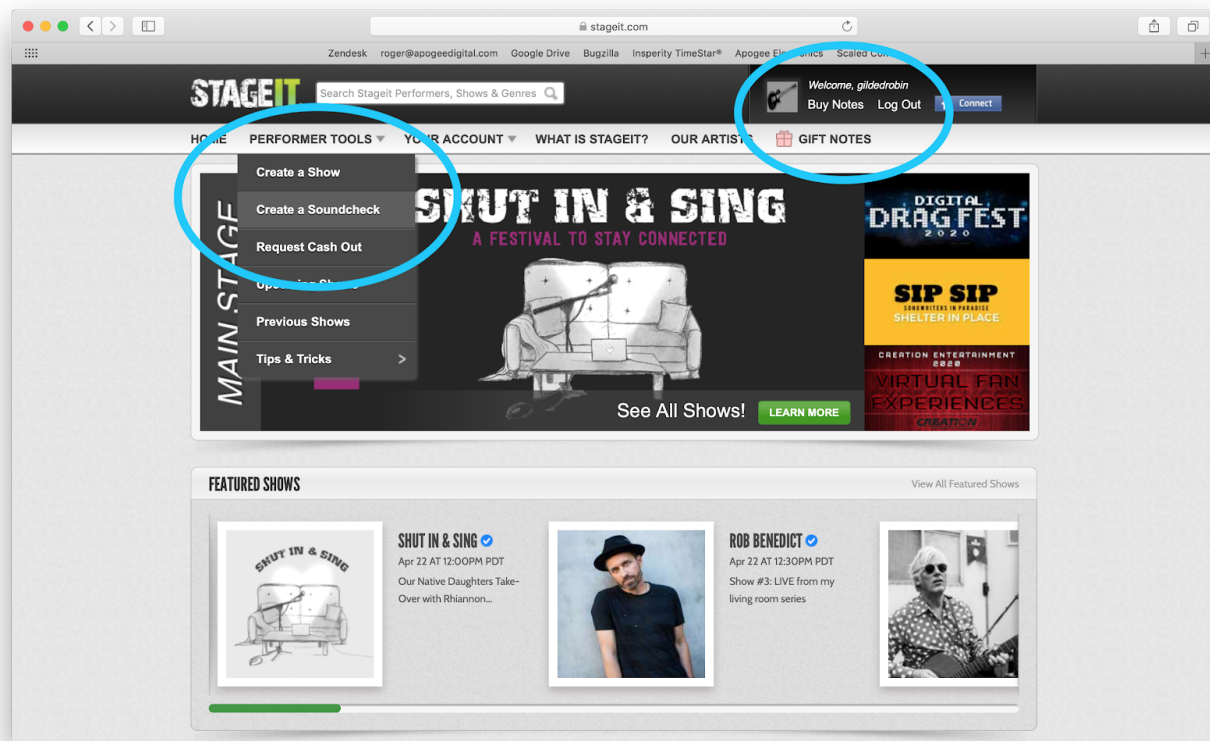

Step 1 - Connect your Apogee interface

You can use any Apogee interface, but those interfaces that include a microphone are the most convenient, such as Mic, Mic96, Mic Plus, HypeMic and ONE. Using the appropriate cable, connect the Apogee interface to your Mac or Windows device.

Before you create a Stagelt account, ensure that you have the latest version of Adobe Flash installed.

Step 2 - Create a Stagelt account, Log In, and Create a Soundcheck

- Go to stageit.com, create an account and log in.
- To get started, click Become a Performer and enter your Stage name.
- Once Performer Tools appears as a menu, click it, then click Create a Soundcheck.

- In the Soundcheck Details page, enter your stage name, show title, and the time and length of your show.

The screenshot shows the 'Soundcheck Details' page on the STAGEIT website. The page has a dark header with the STAGEIT logo and a search bar. Below the header is a navigation bar with links: HOME, PERFORMER TOOLS, YOUR ACCOUNT, WHAT IS STAGEIT?, OUR ARTISTS, and GIFT NOTES. A notice at the top states: 'Notice: Changes will not effect your show until you click "save"'. The main content area is divided into two columns. The left column contains a 'new artist' badge, a 'Soundcheck' section with details for Robindore (3:55 PM, April 21, 2020, 10 minutes, Starts in 1 hour, Ticket Price: Pay What You Can | 5 tickets left), an 'Upload Photo' button, a 'Name Recognition' section with fields for Headlining, Robindore, What name(s) would you like your audience to see?, Show Title, and Soundcheck, a 'Schedule & Duration' section with a date/time picker (04/21/2020 03:55 PM, PDT Change), a show length slider (10 minutes), and an 'Additional Options' section with a checkbox for 'Send me an email reminder before my show starts'. The right column features a 'How to Create a Show on STAGEIT' video thumbnail. At the bottom right, there are 'Cancel' and 'Save' buttons.

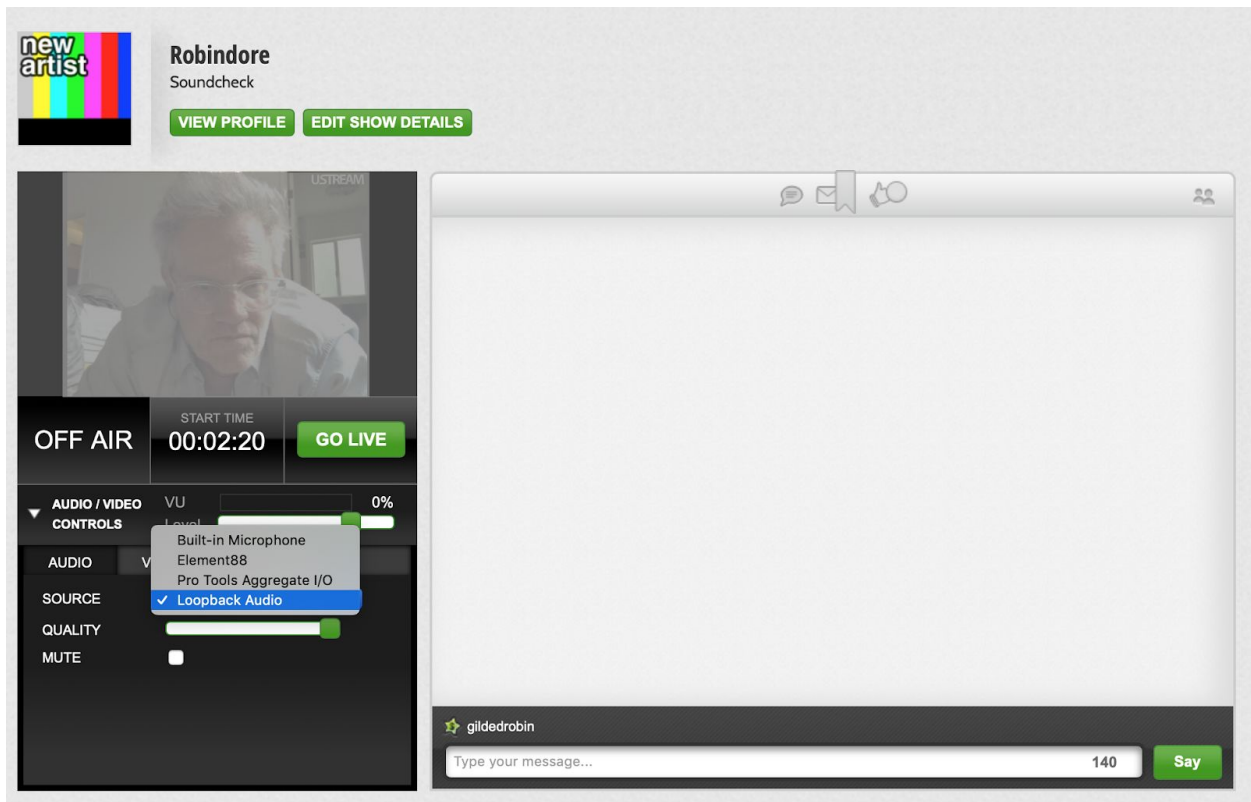

- Click Save. Next, a page appears with your Show Details, so you can invite a trusted colleague to evaluate your Soundcheck and give you feedback.
- Once you schedule a Show, you can get the word out to your fanbase about your upcoming Stagelt performance from this page.

The screenshot shows the 'Show Details' page on the STAGEIT website. The page has a dark header with the STAGEIT logo and a search bar. Below the header is a navigation bar with links: HOME, PERFORMER TOOLS, YOUR ACCOUNT, WHAT IS STAGEIT?, OUR ARTISTS, and GIFT NOTES. The main content area is divided into two columns. The left column contains a 'Congratulations!' message, a 'Your show has been created. Now get the word out there!' message, a 'new artist' badge, a 'Soundcheck' section with details for Robindore (Apr 20 - 12:30 PM - 10 Min Show), and buttons for 'Edit Show Details' and 'Email Followers'. The right column contains a 'Twitter' button, a 'Like 0' button, a 'Copy link to clipboard' button, and a URL: https://www.stageit.com/robindore/soundcheck/78668. Below the main content area, there are three sections: 'Ready to take the stage?' with a 'GO TO STAGE' button, 'Marketing Tips' with a link to 'Learn effective ways to promote your show to your fans here.', and 'Fill out your profile' with a link to 'Let your fans know who you are and where they can find you. Share your social media links and write your bio here.'

- When you're ready to take the virtual stage, click Go To Stage.
- In the left column, click the Audio tab, then choose your Apogee interface in the Source dropdown menu. Note that regardless of your Apogee interface, audio is broadcast in center-panned mono sourced from channel 1 of your interface.
- Click the Video tab and choose your video source, either your built-in FaceTime camera or an external webcam.
- Once you've set your audio levels and adjusted your camera, click Live to run your Soundcheck. Once you're comfortable with the process, go to the homepage and select Create a Show under Performer Tools.

- For advanced users, there are more complex options available using Adobe Flash Media Live Encoder that are beyond the scope of this guide.
- Here's to great success with your Stagelt performance - go live and sound amazing!
